It is free, it is not a game, just sit and watch. And fear If you hate quicksaves and love cheap deaths it's the 2003 game for you (now in 4K, no joke).. I got it i now just found out that i help the enemy!! :(Got this from the humble monthly so had no expectations whatsoever. It's great. It's hard and the level design and graphics are really nice. I'm not a big fan of the genre but i would buy it even without the monthly bundle.. As the man currently holding the record for playtime on this masterpiece, I can safely ensure your satisfaction whilst playing this game. If you liked the game Spore, you're gonna love seeing the 3 creatures you probably made before you stopped playing. Join Sully from Monsters Inc. and his friends Angry Bird Negro, and SpongeBob's Cat as you race against the clock to go down some stairs and try to avoid getting danced at. Expert tip: play this game on the Nintendo Switch, It will have far better performance. 98/100 (I gave it -2 because they didn't have any of the original FNAF Pokemon in it). Cool story, great value per dollar spent on a game. Totally recommended if you like TellTale and The Walking Dead stuff. A lot of narrative choices, I became a heartless meanie in the first 5 minutes. :D. I loved playing this game when I got it cheap second hand back in 2012.

The game feels so aimless, trying to find anything is ridiculous and if you die it's game over and back to the very start. There should be a save system. There is apparently some sort of negative disease progression system, wouldn't know, never survived that long.. Great Little dungeon blobber.

Lotsa Secrets to find

Good Classes to pick from

Bit to short though.

- Click to deliver pizzas
- Design pizzas
- Conquer the universe. I beat the 30 levels in under an hour, most of the levels are fairly easy but some of them are extremely hard.. I have play for a few hours and it shows me all of the time spent and my accomplishments but it will not let me access the two times I saved the game. This game sucks!!!!. Mars Colony: Frontier is my favorite game right now. It is obviously not that popular, but I think it's a very good game. I like frontier more than challenger because I think the graphics are okay and game play is good (Remember that some video game company's don't have a lot of money so they can't make really good graphics). Some people say that Mars Colony: Frontier has been abandoned, but they are completely wrong (no offense guys) due to the post on the MCF Twitter pageback in January. Here is what they said.

Mars Colony Frontier @MarsColony2

Working on a new version of Frontier hope to have it out in the spring

Game updates can take a long time because there is only one person (Howard Dortch) working on the updates. MCF also has a few bugs. Sometimes it will crash, and when you update base modules, they will move to the wrong spot. Just don't upgrade the until the next update)

Another reason why MCF is fun because there are random events and dust storms. You need to manage your resources in the game also.

Remeber, Mars colony frontier is under works. If it doesn't look playable right now, go do something else until Howard Dortch gets the next update out.. First impressions:

It's a cheap tower defense game. I played almost until like the last round of the first stage (assuming there are more stages lol).

Honestly I didn't really want to keep playing. It looks like something you could find on places like kongragate.com and play for free in your browser or a mobile device game ported to PC. It has pretty basic gameplay and graphics: really basic. You only have access to two types of turrets from the start which are pretty boring. Presumably you have to make it to later levels to access more turrets. So basically the game restricts your options from the start.

The only reason I would recommend this game is if you want a cheap tower defense game. But be warned that is exactly what you will be getting. I just played Radiant Defense the other day which is another recent tower defense game on steam and that's a much better colourful game. Radiant defense is actually the same price. The only reason Defense Zone is cheaper right now is because it is on special. Which is the better choice? You do the math lol

Seriously click here for gameplay footage of Radiant Defence and my first impressions review to see for yourself
